

Automatic Extinguisher Ceiling Mounted 9kg

There will always be areas in a workplace where the chances of detecting a fire early are few and human traffic very low. Automatic Fire Extinguishers are for fixed installation adjacent to a fire risk and discharge automatically if a fire occurs. Each unit is fitted with a heat activated glass bulb sprinkler head. Dry Powder Automatic extinguishers are commonly used in engine / plant rooms, switch rooms and boats.

Ceiling Mounted extinguishers, with their automatic detection and activation feature prevent such an occurrence. Because they are ceiling mounted, they are also useful in areas that are beyond the range of normal fire extinguishers, such as chemical stacks.

In the event of a fire, Safequip's Ceiling Mounted extinguishers activate automatically, distributing the extinguishing medium over an area of approximately 3m², ensuring that the fire is brought under control rapidly and efficiently.

Specification:

Mounting Bracket: T- piece $\pm$ 100mm from ceiling

Can Height: 350mm

Diameter: 350mm

Discharge time: Minimum 10 Secs

Discharge Mechanism: Automatic at 68°C

Applicable on: Class A, B & C fires

External Coating: Epoxy Polyester Powder coating

Extinguishing medium: Class ABC Dry chemical Powder 40% MAP

It is important that you do not exceed the recommended compartment volume.

Fire Rating: 27A/70B

Stored pressure dry chemical powder extinguishers are suitable for class A (combustible materials), class B (flammable or combustible liquids) and/or class C (electrical) fires or a combination of ABC class fires.
