PROMASK RAS - POSITIVE PRESSURE FACEMASK FOR SCBA & FILTER

DESCRIPTION

The Scott Promask RAS is available in different sizes and will accommodate a wide range of facial shapes and sizes. The masks are positive pressure and feature a Butyl Rubber (Procomp™) outer mask with reflex seal and silicone ori-nasal inner mask.

The facepiece visor is single curvature and made of a scratch and impact resistant polycarbonate material with a flame-retardant coating and provides excellent panoramic vision. The visor is held in place by two U-shaped clamps.

The mask will allow the wearer to wear integrated spectacle frames, without compromising the facemask seal. The mask is available with either a five-point fully adjustable neoprene strap style harness or a two-point adjustable Polyester or Kevlar™ net style harness. The facemask features a left hand side bayonet connection for the demand valve. An option of an additional right quick-fit port to take a communications interface or a drinking adaptor is also available.

The facemask features a left hand side bayonet connection for the demand valve. It also features a right sided DIN40 threaded connection which enables the fitting of a standard filter canister.

A speech diaphragm is mounted at the front of the mask to offer unimpeded speech transmission and there is a low resistance positive pressure exhalation valve that allows for normal breathing with no extra effort.

APPLICATIONS

The Promask is specifically designed for use with the Scott range of breathing apparatus from the Professional Fire Fighting SCBA through to the Airline and Escape breathing apparatus range. In conjunction with Scott breathing apparatus it is suitable for providing respiratory protection in an IDLH environment.
